PROFESSIONAL SUMMARY

As an Information Technology student at the Institute of Technology, University of Moratuwa, I've completed two years of academics with consistently high performance in my coursework. Now, I'm actively seeking internship opportunities in the field of Software Engineering. Eager to apply my knowledge and skills to real-world projects and challenges, I'm excited about the prospect of gaining practical experience in the industry.

CORE COMPETENCIES

- Java (Spring Boot)
- JavaScript (ReactJS, NodeJS)
- PHP (Laravel)
- MySQL
- PostgreSQL
- MongoDB
- Front-end & Back-end web development
- Test driven development
- Code structure & Architecture
- Agile Methodologies
- Problem Solving (LeetCode, HackerRank)

WORK EXPERIENCE

SEAMLESS ADVANCED SOLUTIONS, Austin, Texas

Senior Project Manager/PMO Lead

Oct 2023 – Present

- Led and managed the full project lifecycle for technical projects, including intake assessment, scope definition, execution, and delivery.
- Established and led a high-performing PMO team, ensuring efficient project execution and knowledge transfer through mentorship.
- Selected as Project Manager for multi-million-dollar Texas A&M Rellis Campus Data Research Center, supporting real-world data center experience for students and researchers, within budget and on schedule for summer 2025 opening.
- Created a program to manage and track progress for Riot Platforms' new \$5M large-scale multi-building Bitcoin mining facility, including design and delivery of a reliable fully functional IT network, with mining operations starting by customer target date.
- Regularly met with Project Coordinators to train on project management and project management process, established weekly project status reports, and standardized communication for project team members' task summaries.

DELL, Round Rock, Texas

Senior Pre-sales Technical Project Manager

Jun 2022 – Feb 2023

- Set project scope, acceptance criteria, and risk management, and ensured projects were resourced correctly and delivered within agreed timelines.
- Managed and closed 28 presales customer engagements totaling \$38M in opportunity value.
- Selected to join the project team as a PM for a Salesforce PowerMax POC, Dell's largest storage customer.
- Slashed onboarding time from 1-2 months to weeks, demonstrating the ability to quickly learn, apply knowledge, and adapt in a fast-paced environment.

Major Incident Manager

Oct 2020 – Jun 2022

- Excelled as a key contributor within the Major Incident Management (MIM) team at Dell, working on 168 incidents during the first year. Played a pivotal role in ensuring efficient incident resolution and maintaining operational excellence, demonstrating exceptional performance and expertise in incident management.
- Appointed Security Champion for Dell's first incident management chatbot (MIMsy), ensuring adherence to Secure Development Lifecycle (SDL) practices and security requirements.
- Recognized at the Vice President level for technical leadership and stakeholder management while managing Dell's major incidents, receiving the "Top Talent MIM" award.
- Led newly created Privacy MIM service, focusing on communication and mitigation of critical IT-related privacy incidents.
- Created and published PMIM standard operating procedure (SOP), training 30+ MIM team members across shifts on new processes.

HP, Spring, Texas

IT Project Manager

Aug 2019 – Sep 2020

- Managed infrastructure and application migration projects for the Data Center Services team, overseeing project planning, metrics, reporting, technical services, site effort coordination, and large-scale long-term planning.
- Led the buildout of a \$25M, 10K sq. ft., first-ever HPI-managed data center, facilitating the migration of 815 app instances and 6,600 servers from 2 existing data centers.

- Managed MSP project managers and project team for Project Beyond, ensuring data center pre-migration tasks were completed before application moves.
- Oversaw project change requests, change management, metrics reporting, and overall application and server readiness, and successfully migrated 337 applications with a 99% success rate.

WOODFOREST NATIONAL BANK, The Woodlands, Texas

Senior Network Engineer/Project Manager

Oct 2018 – Aug 2019

- Managed, protected, and supported enterprise banking systems, ensuring daily operations were maintained.
- Led projects to support system installations, branch expansions, and facility remodel projects.
- Oversaw the completion of an enterprise network management software suite for 800 branch locations, managing and monitoring 3,000 network nodes.
- Created and published the first team process, standardizing procedures for system updates requiring change management.

HUNTSVILLE MEMORIAL HOSPITAL, Huntsville, Texas

Senior Network Engineer/Project Manager

Jul 2015 – Oct 2018

- Headed development and implementation of highly visible network upgrades supporting mission-critical directives.
- Established a reputation for resourcefulness and versatility as sole network engineer and partnered with key stakeholders leveraging solid healthcare and technical expertise.
- Managed network core upgrade project with 0 reportable incidents and downtime supporting 24/7, 365-day hospital operation.
- Eliminated nonessential telecommunications services and enhanced network management suite, slashing costs by \$6K annually.

HALLIBURTON, Houston, Texas

IT Network Analyst Consultant/Project Manager

Dec 2012 – Jul 2015

- Supported strategic objectives through effective project management, driving synergies, and developing high-performing teams to ensure the attainment of time-sensitive deadlines.
- Drove time-critical, wireless network project completion ahead of schedule, enabling expected monthly volume material transactions of \$8K supporting \$20M in shipments.
- Commended for vital improvements to the budget review process, resulting in a reduction of average variance from -13% to 0%.
- Inspired and mentored technical support teams, orchestrating team meetings and leveraging a charismatic leadership style to ensure accountability, resulting in the closure of 470 tickets and a 37% increase in production over the prior year.

EDUCATION

2021 - 2024 | University of Moratuwa

National Diploma in Technology - Information Technology

2019 - 2020 | Information and Communication Technology (NVQ Level 4)

6 months course period & 6 months training period

CERTIFICATIONS

Basic Java Development - DigiMax Edu Lk

Developing Back-End Apps with Node.js and Express -

Coursera (Reading)

AWS Cloud Practitioner Essential

English Skills development Course - Leo Club,

University of Colombo
Introduction to Artificial Intelligence (LinkedIn)

PROFESSIONAL DEVELOPMENT

Dell Digital People Empowering Diverse Leader Program

Frontline Supervisor Training (Halliburton)

Business Management & Communication Training (USAF Airman Leadership School)

Affiliations: Project Management Institute (PMI); PMI Austin Chapter
